EDUCATION

Queen's University

Kingston, ON

Bachelor of Computing, Specialization in Cognitive Science

September 2024 – June 2028

- Relevant Coursework: CISC 204 (Logic for Computer Science), STAT 263 (Statistics), COGS 201 (Cognition and Computation)

EXPERIENCE

Student Intern

April 2025 – September 2025

RBC Dominion Securities

Toronto, ON

- * Developed and maintained client-facing websites with HTML5, CSS, and JavaScript, enhancing financial advisor branding and client engagement by 75%.
- * Built a Python automation tool for AI-generated scalable presentations from PowerPoint slides and Word scripts, producing 10+ hours of client-facing training videos while reducing the time of manual recordings by 80%.
- * Applied UX/UI design, accessibility standards (WCAG), and responsive design principles.
- * Collaborated with Investment Advisor to design digital resources that improved client learning and financial literacy.

Developer

January 2025 – June 2025

Skul (Startup)

Remote

- * Designed and implemented a Shopify App Embed using Ruby on Rails, JS, HTML5, CSS, and AWS EC2.
- * Integrated AI-generation tools to improve product automation for store owners and speeding up website traffic by 2.5x.

Education Executive

September 2024 – Present

Queen's Web Development Club

Kingston, ON

- * Deliver interactive weekly lectures/workshops to build members' React, Next.js, Git, and other technical skills in web development, while having a 100% participation rate.
- * Supervised 2+ project teams during Winter Sprint, delivering websites for real clients on time and guiding members to maintain a 100% project completion rate.
- * Currently managing directors of the Education team, coordinating tutorials, and driving improvements in teaching quality.

PROJECTS

Screen Intelligence | *Python, JSON, GPT API, Automation*

March 2025 – Present

- * Developed an AI accessibility tool that allowed full computer navigation via voice recognition, enabling users to complete common tasks 2× faster without traditional input devices.
- * Integrated GPT API for context-aware actions, improving natural user interaction by utilizing user's repeated actions and simplifying computer use thereby saving 50% of the time.

News Podcast | *Python, JSON*

July 2025 – Present

- * Automated a personalized 3-minute news podcast pipeline, summarizing articles into clear, natural language generation (NLG), thereby providing relevant information and only taking 3 minutes.
- * Pulled data from multiple APIs to ensure 100% accuracy and 100% unbiased sources.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Ruby, SQL (Postgres), HTML, CSS, Bash

Frameworks: React, React Native, Next.js, Electron, Node.js, Flask, FastAPI, Rails, Express, Jest, Tailwind CSS,

Libraries: pandas, NumPy, Jimp, PyAutoGUI, OpenCV, Vosk, face_recognition, SQLite

Developer Tools: Git, Docker, VS Code, PyCharm, Postman, Supabase, Google Cloud Platform, AWS (EC2, S3), Electron Forge

Other: Shopify App Embed, REST APIs, WebSockets Object-Oriented Programming (OOP), Machine Learning (ML)

ADDITIONAL EXPERIENCE

Participant

January 2025

Hackathon

Kingston, ON

- * Collaborated in a 48-hour hackathon, developed an application to improve the use of local shopping by making items shown 85% more relevant.
